

Keynote  
Speaker

**MEEP** 2025

KKL LUCERNE, 2 – 4 July

# ELISABETH HEIDRICH

Lecturer and Research  
Fellow

Newcastle University

Getting Microbial Electrochemical  
Technologies out of the lab:  
and reasons to go back in again (M1002)

## TALK TITLE

Getting Microbial Electrochemical Technologies out of the lab: and reasons to go back in again

## ABOUT

**Elizabeth Heidrich** is a Lecturer and Research Fellow at the Newcastle University, UK. Her research centers on the field of microbial electrochemistry, with a focus on unraveling the fundamental aspects of biological systems that convert organic molecules directly into electrical current, aiming for practical applications such as wastewater treatment.
